Some of the other roles to fill in a data science team include the data solutions architect, data platform administrator, full-stack developer, and designer. Those companies that have teams focusing on building data products will also likely want to have a product manager on the team.

**How to Build a Data Science Team - Data Science Central**
A data science cross-functional team may incorporate data scientists, analysts, predictive modelers and engineers – all working together towards a common goal.

**3 Ways to Create Cross-Functional Data Science Teams ...**
You should form small, agile-like data teams that focus on delivering valuable insights early and often. You can make real changes to your organization by telling compelling data stories. These stories are the best way to communicate your insights about your customers, challenges, and industry.

**Data Science | SpringerLink**
The Team Data Science Process (TDSP) provides a lifecycle to structure the development of your data science projects. The lifecycle outlines the full steps that successful projects follow. If you are using another data science lifecycle, such as CRISP-DM , KDD, or your organization's own custom process, you can still use the task-based TDSP in the context of those development lifecycles.

**What is the Team Data Science Process? | Microsoft Docs**
Data Science teams are prone to becoming packs of lone-wolf modelers even when working in the same place. With the switch to remote, it's even easier to fall into this trap. Fortunately tools exist that make it far easier for data scientists, machine learning engineers, or anyone working on models to log, visualize, share and reproduce their ...

**How to Make Remote Work Effective for Data Science Teams**

Data science is an exercise in research and discovery. The ability to communicate tasks to your team and your customers by using a well-defined set of artifacts that employ standardized templates helps to avoid misunderstandings. Using these templates also increases the chance of the successful completion of a complex data-science project.
