Problem Set 4 Solutions

PROBLEM SET 4 SOLUTIONS PROBLEM 1:
PHOTON TRAJECTORIES AND HORIZONS
IN A FLAT UNIVERSE WITH $a(t) = bt^{1/2}$
(20 points) (a) The defining equation for
 $a(t)$ is $\dot{a} = a(t) H$; so $[a(t)] = [c]$
 $[H] = \text{meter notch}^{-1}$; and $[b] = [a(t)]$
 $[t^{1/2}] = \text{meter notch}^{-1/2}$: (b) (2
points) $H(t) = \frac{1}{2} \frac{\dot{a}}{a} = \frac{1}{2} \frac{b t^{-1/2}}{bt^{1/2}} =$
